

ILCOLUX – Association of Ostomy People of Luxembourg

Report of our association April 2011

Our association was formed in 1981, we celebrate this year (October 2011) the 30th anniversary by a friendly meeting of all our members and friends.

Luxembourg is a very small country (+/- 550.000 habitants) and by this way ILCOLUX is a rather modest association with about 55 members. But in spite of this low personal importance, Luxemburgish ostomy patients are well surrounded in medical way and in the equipment necessary for their handicap. Ostomytherapists are easy of access for us at different points of Luxembourg.

Several members of the ILCOLUX-staff are always within reach for ostomy concerned a person in order to listen to their complaints and give them good advises.

So ILCOLUX tries to bring a precious help for ostomy people.

Luxembourg, April 2011, ILCOLUX
